

# TeT Limited

## Transforming Every Tomorrow Vulnerability Management Service

Cyber Essentials is a solid baseline for improving your organisation's security posture...

Certification confirms your status on the day of assessment, but new devices, software updates and emerging threats introduce fresh risks every month.

**THE CHALLENGE IS THAT IT ENVIRONMENTS CHANGE CONSTANTLY.**

TET's Vulnerability Management Service provides continuous oversight so you avoid slipping back into a risky position between assessments.

You receive clear reporting, actionable insights and hands-on remediation support that keeps your systems protected year-round.

# 40

YEARS IN IT  
EXCELLENCE

OFFICES ACROSS THE  
UK, USA & EUROPE.

## You Gain

- A monthly vulnerability report covering all in-scope devices.
- Clear visibility of current risks, severity ratings and affected systems.
- Rapid remediation carried out by TET, reducing the time vulnerabilities remain open.
- Improved operational safety because issues are identified and resolved before they can be exploited.
- Better preparation for Cyber Essentials re-certification because evidence and activity records are maintained throughout the year.
- Reduced load on internal IT teams, who no longer need to manage scanning, triage or patch cycles alone.

## Managed Service Elements

TET provides a fully managed vulnerability lifecycle. You focus on day-to-day delivery while TET handles the technical workload and reporting.

### Monthly Vulnerability Scanning

TET schedules, runs and monitors all scans. There is no need for you to manage tooling or scanning windows. TET validates scan completeness and accuracy before reports are produced.

### Reporting and Visibility

Each month you receive a structured report containing:

- detected vulnerabilities
- severity levels
- affected systems
- remediation status
- repeated issues or trends

### Remediation Work

TET handles the technical remediation of identified vulnerabilities. This includes applying patches, configuration changes, or control adjustments.

### Exception and Change Handling

TET will raise the required actions with your nominated contacts, provide impact context and schedule changes.

### Continuous Improvement Review

TET tracks recurring issues, high-risk categories and trends over time. This gives you a clearer view of structural weaknesses or architectural improvements.

## Built on Expertise. Driven by Relationships.

At TET Limited we are more than a technology provider – we are your trusted partner.

With over 40 years of industry experience and deep vendor expertise, we take a consultative approach to deliver tailored solutions that empower your business.

Our Foundation is built on strong relationships, ensuring every engagement is collaborative, transparent and focused on your success.

*“I have used TET Limited for a number of years and have always been impressed by their great customer service, extensive supply chain management and ability to provide the items required when we need them. I have no hesitation in recommending TET Limited as a partner to work with.”*
